

Deleting Spam: Email

- 1) Open your Internet Explorer Browser.
- 2) In the address bar location type in **mail.yourdomain.com**
- 3) Enter in your **username** and **password**. (see Fig. 1)
- 4) Click **Log In** button (see Fig. 1)

A screenshot of a webmail login interface. At the top, a grey header bar contains the text "Welcome to our WebMail System". Below this, on the left, is a small cartoon penguin icon. To the right of the icon is a "Languages..." dropdown menu. Further right are two input fields: "User ID" and "Password". Below the "Password" field is a "Log In" button. At the bottom of the form area, there are two checkboxes with accompanying text: the first checkbox is for "increased security" and the second is for "cookies to store your log-in information".

Fig. 1

5) Click on the **Account Options** drop down menu and select **Filters**. (see Fig. 2)

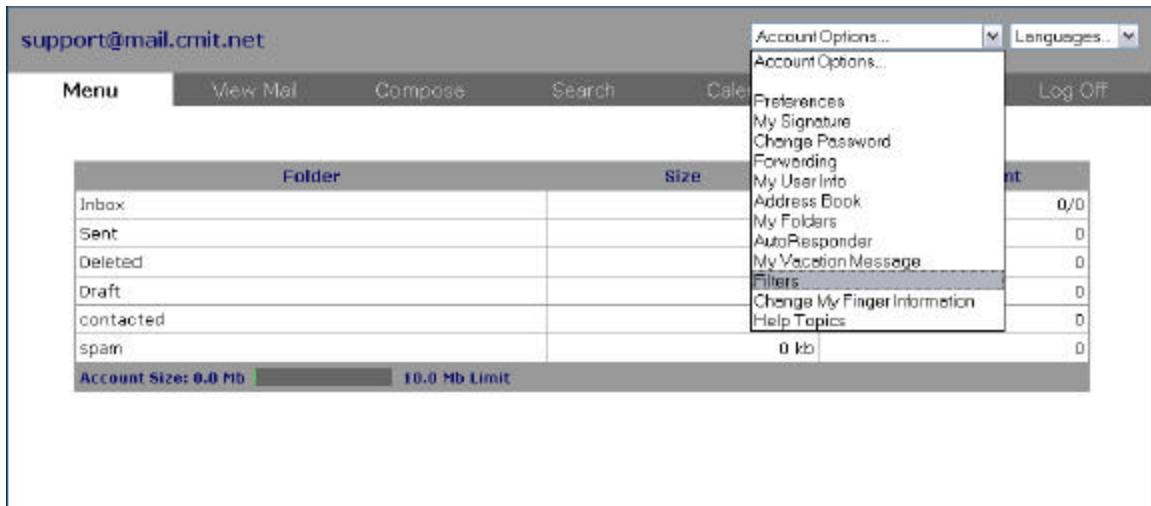

Fig. 2

6) Click the **Add** button to add a rule. (see Fig. 3)

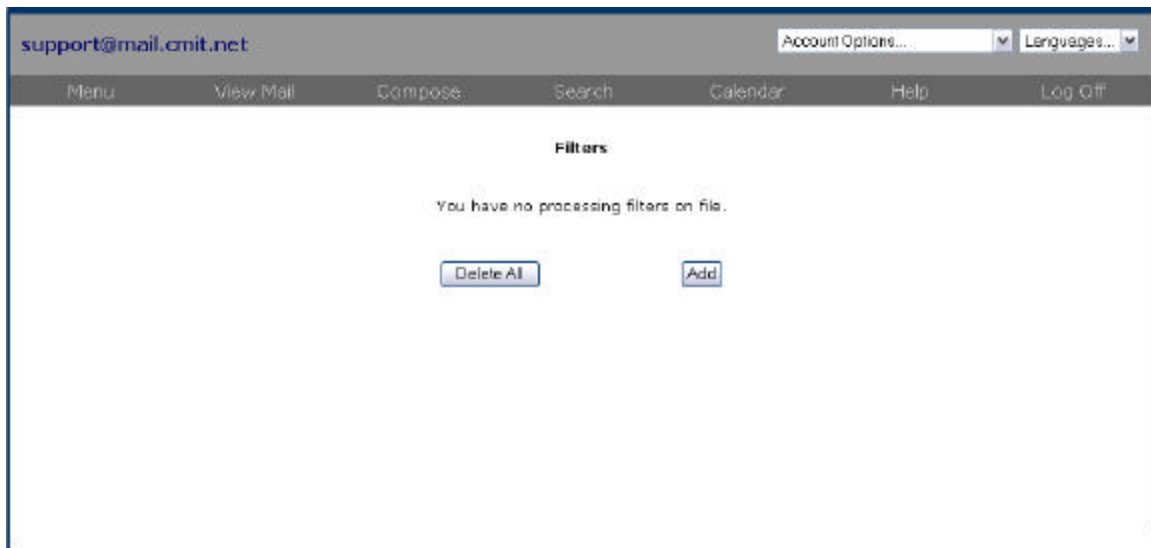

Fig. 3

7) Click on the **Select Field** drop down menu and select **Subject** (see Fig. 4)

8) Click the **contains** radio button. (see Fig. 4)

9) In the **Phrase** text box enter **Spam:** (see Fig. 4)

10) Then click on **Add Condition** (see Fig. 4)

Edit Rule

1. Select the FIELD that you want to search.
2. Enter a search string in the text box below. Enable the checkbox to allow the search text to come from an external file. The listbox shows a list of the existing rule files. Click on 'Update' to get the contents of selected rule file. The maximum limit for a direct search string (not from an external file) is 255. Search strings more than 255 will be truncated at 255.
3. Enter a mailbox or an email address in the text field. Incoming mail will be directed to this mailbox or email address when the rule is asserted. If nothing is entered in the textbox the filtered message will be placed in a mailbox named, 'new'.

Select Field
Subject contains doesn't contain

Phrase
spam:

Case sensitive match
 Search string from file: [dropdown]
